RRP

PACKAGE 1:

\$1350

- **1 X 2000W Pure Sine Wave Inverter**
- **Remote switch**
- **240V PowerPoint mounted to front of the unit**

The perfect addition to any off-grid system, whether for a van or a cabin, the Renogy 2000W Pure Sine Wave Inverter acts as a DC to AC converter that allows you to power your household appliances. Unlike modified sine wave inverters, this 2000W inverter is a pure sine wave, capable of producing cleaner, smoother, and more reliable electricity to operate tools, fans, lights, and other electronics without interference. The AC priority switch function enables the inverter to automatically switch from the battery (DC) to the mains (AC).

PACKAGE 2:

\$2600

- **1 X 2000W Pure Sine Wave Inverter**
- **Remote switch**
- **240V PowerPoint mounted to the front of unit**
- **2x 100amp Renogy batteries with built-in Bluetooth**

The perfect addition to any off-grid system, the Renogy 2000W Pure Sine Wave Inverter acts as a DC to AC converter that allows you to power your household appliances. Unlike modified sine wave inverters, this 2000W inverter is a pure sine wave, capable of producing cleaner, smoother, and more reliable electricity to operate tools, fans, lights, and other electronics without interference. We have packaged this with 2 x 100 amp Renogy Smart Lithium Batteries, designed for the drop-in replacement of deep-cycle lead-acid batteries. Manufactured with automotive grade battery cells, they offers excellent cycle life expectancies even under high and varied loads. Hosting intelligent software, the advanced BMS provides comprehensive protection to the battery. The built-in Bluetooth module enables remote monitoring on mobile devices in real time.

RRP

PACKAGE 3:

\$7700

- **2 x 100 AMP Lithium Batteries**
- **2 x 200w Solar Panels**
- **1 x 30 AMP DC-DC Charger With MPPT 25 AMP Solar Regulator**
- **1 x 2000w Pure Sinewave Inverter With 65 AMP 240V Battery Charger**

This package can run most small 240v appliances with your 200 amp power battery bank and be self-sufficient with your 400W of solar and be able to charge from your vehicle while you are traveling.

Inverter:

- Electronic overload protection with automatic shutdown.
- Built-in internal backup DC fuse provides added safety.
- Low battery voltage protection with automatic shutdown.
- Over temperature protection with automatic shutdown.
- Output short circuit protection.
- UPS (AC priority switch) function: Transfers input power between battery supply & AC main within 50mS

Solar:

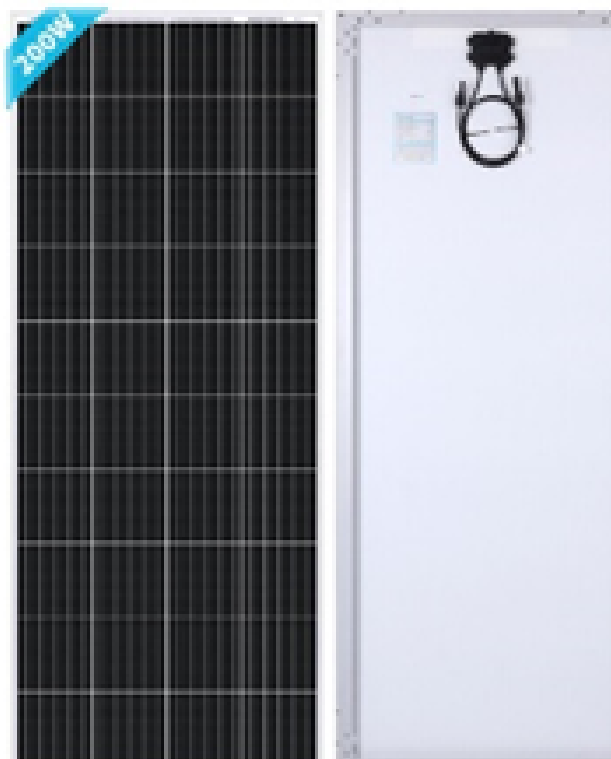

The Renogy 200 Watt 12 Volt Monocrystalline Solar Panel is one of the main components for any solar power (PV) system. The panel includes solar leads that extend from the junction box affixed to the back. The solar leads are compatible with the Renogy Solar Adaptor Kit—allowing for a quick and simple connection. Each Renogy 200W Monocrystalline Solar Panel is quality tested to ensure safety and longevity. Built durable for outdoor use, these panels are capable of withstanding harsh Australian conditions. Whether you plan to use the solar panel for seaside travels to the beach or an off road adventure this panel can be a great start or addition to any Renogy off-grid system.

DC To DC Charger:

Renogy's DC to DC MPPT on-board Battery Charger is designed to give you options! This multi-stage, multi-input battery charger can charge a service battery from a starting battery linked to an alternator or by utilizing solar panels connected directly to the unit. While your vehicle's alternator prioritizes your starting battery, this unit will allow your solar system to charge your service battery first! It's the smart way to keep yourself fully charged and off-grid longer. Renogy's DC to DC MPPT Charger has you covered whether you're using Lead Acid, Gel, AGM, or Lithium batteries. With RJ45 communication port featured, you can unlock monitoring features exclusively using the BT-2 Bluetooth Module and Renogy DC Home App, control and monitor the device remotely through your phone in real time.

<u>PACKAGE 5:</u>	
<ul style="list-style-type: none"> • AGM Battery Pack's • 50 AMP Anderson Plug • 175 AMP Jumper Leads • 2 Outlets - 12v Socket & 2 Pole HD Socket • Digital Volts Gauge • HD In Car Charging Kit 	<p><u>60 AMP BATTERY PACK</u> \$750</p> <p><u>130 AMP BATTERY PACK</u> \$990</p>

The Performance range is proudly South Australian made and owned. Each unit is handmade from start to finish to produce the best portable dual battery system. The Performance Portable Battery Back is built tough to withstand off-road use.

It can be tied down into place so it can't be damaged or cause damage. The box is made of aluminum and the handles are made of steel. It has one AGM battery in the pack that can be replaced when needed.

The battery pack is used as a dual battery system for vehicles that cannot fit a dual battery system under the bonnet. This unit can be used to power up caravans, for camping to run lights, fridge and to jump-start cars and trucks etc.

In-Car Charging Kit:

The in-car charging kit is very easy to install with no ignition feeds, to do so you just need to hook up the cable to the battery, then mount the smart solenoid and the 50amp circuit breaker and run the cable to where you want your pack. (Easy instructions come with the pack along with contacts for technical support) It is made with 6m of B&S battery cable so you won't get any voltage drop. The charging kit is 50amp and will charge between 2-4 hours depending on your alternator output. The smart solenoid charges when the main battery is at 13.5v and disconnects the auxiliary battery when the main battery is at 12.5v.

Battery:

The battery is 1 x AGM, completely sealed so it won't leak acid or gases. It can be stored on its side while working. The battery can be put in a non-ventilated area like in the back of a car or in a caravan etc. The battery can be charged by a 240v charger and can be charged in a car by the alternator. It can also be charged by solar. The battery can charge in as little time as 3-4 hours.

Features:

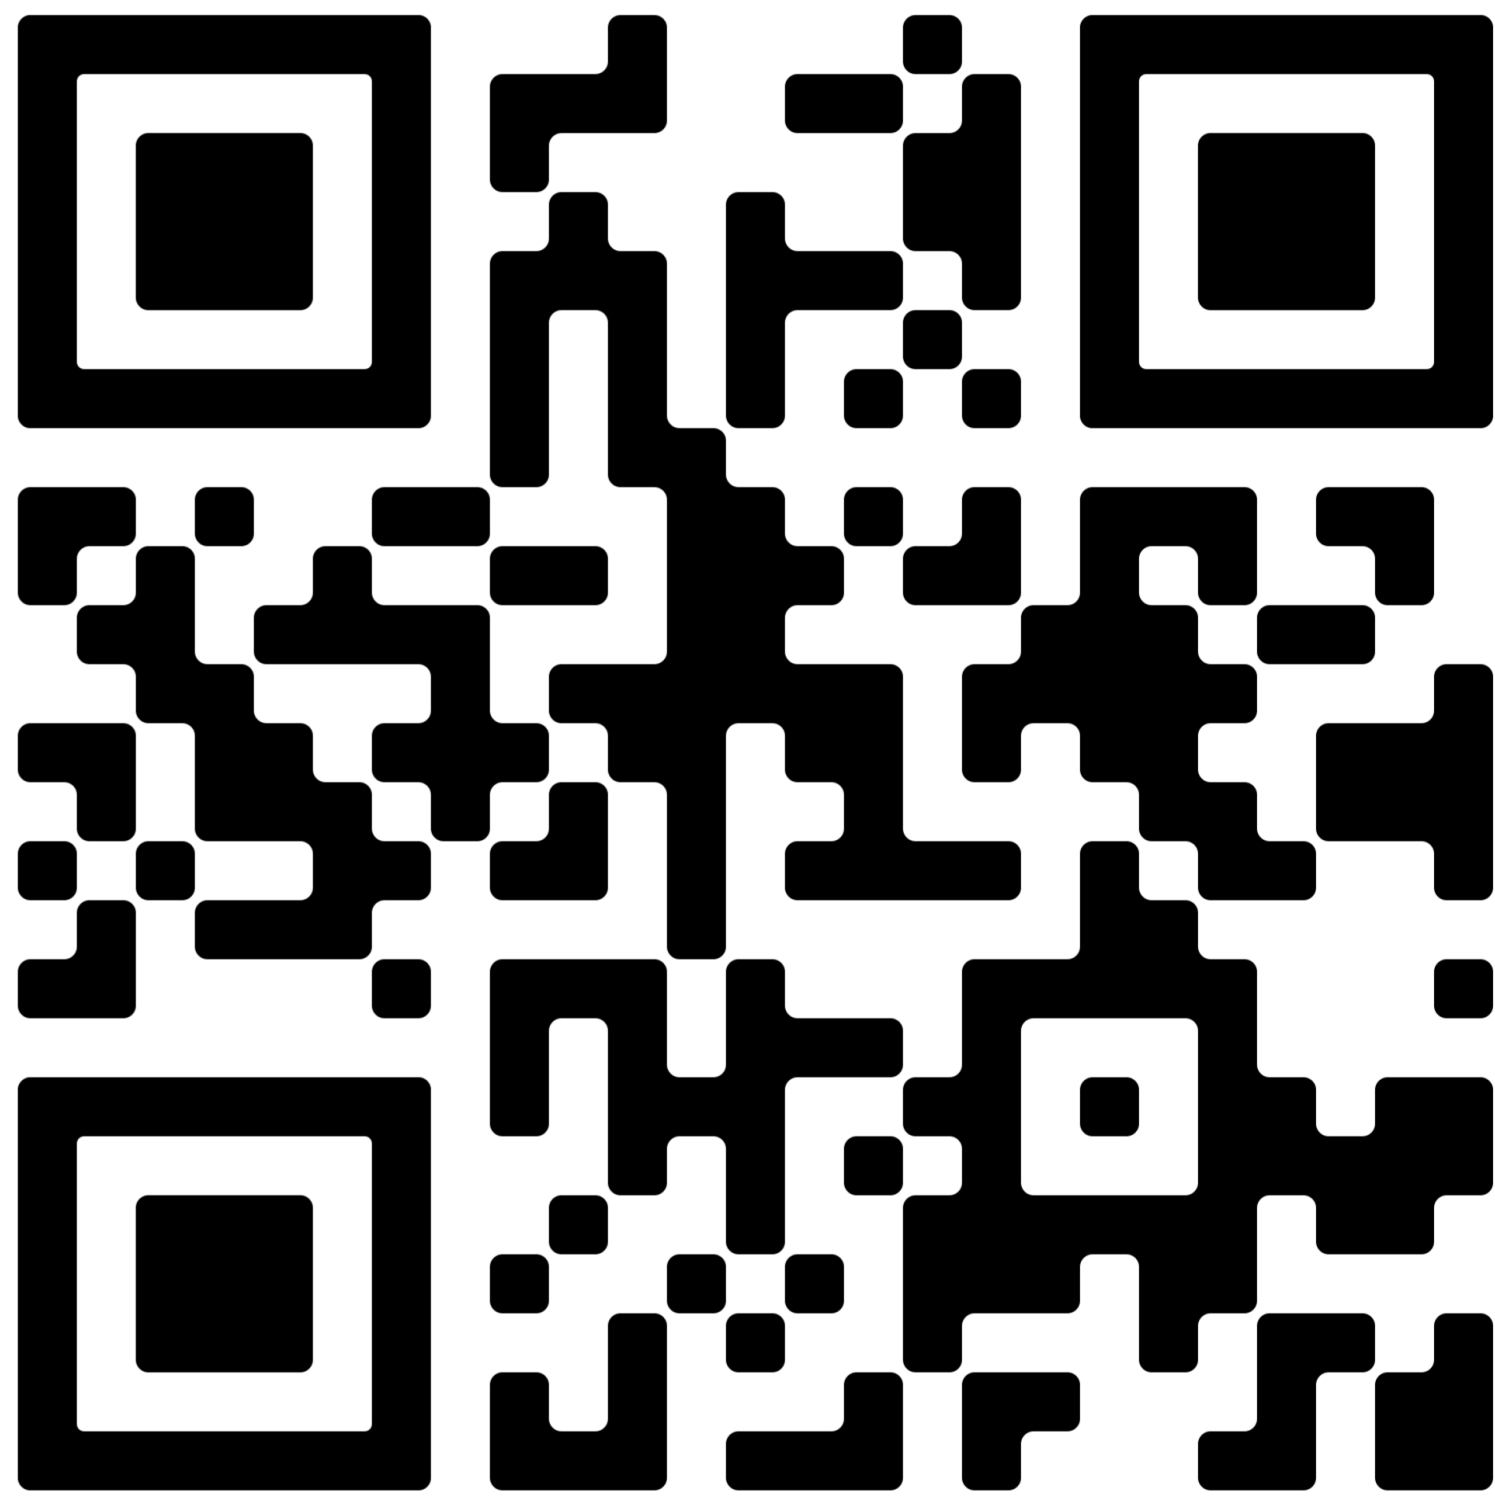

- Can be utilised for your Vehicle along with your Caravan/Camper
- Runs a compressor fridge for up to three days
- Surge Protected
- 6L Diesel Jump Start
- 50 amp Anderson plug for charging
- 2 x 10 amp manual reset circuit breaker on sockets
